

DSL SERVICE

Business DSL is high-performance broadband with reliability your business can count on.

Business DSL services provide download speeds up to 15 Mbps over a nationwide, multi-redundant private network that optimizes performance and security. DSL is an ideal broadband solution for small and medium-sized businesses that download large files or use the Internet extensively, as well as branch offices and remote workers.

We offer a variety of DSL service options to meet the unique needs of your business:

ADSL: Allows information to flow asymmetrically up to 6 Mbps / 768 Kbps for quicker email delivery and file downloading.

OneLink™ ADSL: Gives you the speed, reliability, and throughput of ADSL without phone service from a local phone company (dedicated line).

OneLink ADSL2: Supplies all the advantages of a dedicated data line service with speeds up to 15 Mbps / 1 Mbps.

SDSL: A dedicated line service that offers a symmetrical data transfer rate, typically up to 1.5 Mbps with guaranteed 99.9% uptime and 24-hour Mean Time To Repair (MTTR).

IDSL. Integrated DSL enables businesses in isolated areas to get symmetrical speeds of 128-144 Kbps with uptime guarantees.

Depending on the service, we offer service level agreement (SLA) uptime guarantees as high as 99.9%. Each service is professionally installed by a skilled technician and comes with valuable free features, including fixed IP addresses so you can host your own website or email server and run a virtual private network (VPN).

The New MegaPath

Triple-Strength Business Solutions

Speakeasy, Covad and MegaPath have combined to form one company serving small, medium and enterprise businesses nationwide.
